FW 24

Starting with the line that connected our two co-founders Lintang Dewantari & Marco Chirico, Kasei Archive evolved into a deeper meditation on the invisible lines that connect us all.

Founded on this principle of interconnectivity, Kasei Archive embodies the forces of rebirth, awakening passion through creation. Its vault of artistry entails the reinvention of great classic wardrobe and a full immersion of experimental electronic music.

For the Fall/Winter 2024 season, Kasei Archive dives into the world of PARANG, a traditional motif from the island of Java in Indonesia which depicts the resilience of the infinite ocean waves that hit the shore. Adapting the classic motif from a vintage batik block stamp, they re-invented the shape of the characteristic interlocking motif with a contemporary touch that matches the bold, minimalistic garments in this collection.
